

AVO™ 3045 BOOSTER

LAUNDRY FABRIC WHITENER CONCENTRATE

Description

AVO 3045 is environmentally friendly and unique Laundry additive. It is a concentrated liquid Laundry Fabric Whitener. It was designed to stop and remove yellowing, rust, and dinginess usually caused by iron in your water supply, and aging pipelines. It was also designed to stop static cling, reduces wrinkling, Whites become whiter, keeps clothes bright and would not dull the whites leaving washed clothes exceptionally white or clean. AVO 3045 is very tough on stains and would not harm fabric like most Chlorine bleach based products. When this product is used regularly it would also prevent rust build-up, discoloring and maintains fabric at their brightest and whitest original color. It makes unloading, ironing, and folding much easier especially where there is no more static cling. **IT LEAVES LONG LASTING FRAGRANCE ON THE CLOTHES AND TOWELS WITHOUT IRRITATING THE SKIN.**

Packing & Concentrate Sizes

- **1 Gallon Bottle approximately 4 liters:**
4 bottles per case
- **5 Gallons**
- **55 Gallon Drums**
- **Tote (330 gal)**

Product Physical & Chemical Characteristics: Concentrate

Appearance: Clear to hazy, Light Straw Colored Liquid
Odor: Mild Lemon Fragrance
Solubility in water: Complete
Specific gravity/ Density: 1.05±0.05
Flash point (COC): >200°F (None to boiling)
Boiling Point: > 200°F
Freeze point: < 20°F
pH: 13.5 ± 0.5
Shelf life: One year
Viscosity as is: < 20CPS Water thin.

AVO™ 3045 BOOSTER

LAUNDRY FABRIC WHITENER CONCENTRATE
